

VIOLET PAPER AAG

What is AAG

AAG is going to become an open source, decentralised, Blockchain which would have the capabilities of running smart contracts like Binance, Ethereum & TRX Smart contracts. It will use a consensus algorithm to decide on the block creator, like every other blockchain, However, unlike Bitcoin and Ethereum it will use the Proof of Stake Algorithm which is known to be a greener alternative to the Proof of Work Algorithm. The block chain will use a Native token called AAG as a medium of payment in the blockchain. The Idea was established in 2021 and Comes into force in 2022 by and been overseen and supervised by the Group of Like Minded visionary People in Italy & Estonia . AAG Coin Global Launch shall commence in January 2023 in a Mega Seminar in Estonia , Malta or Switzerland, where everyone shall know about the workforce behind this Decentralized Project as well as about the **AAG Academy**.

Aag Road-Map Summery

Currently, AAG token has been created on BINANCE SMART CHAIN for start-up. Further its latest venture, the USDD an algorithmic would be created in the wake of the UST's(US Terra) demise has still survived even when people are criticising the entire existence of algorithmic stable coins. Another **vision of AAG** would completely change the **Entertainment and Gaming** industry by advancing decentralised content sharing on its platform. **AAG** shall become block chain of choice for developers to host entertainment applications and a necessity in smooth operations of **NFTs, Metaverse, Games & Digital Assets Education** .

Conclusion

AAG Violet Paper Summary : The project aims to decentralize the sharing of content on the internet and Smooth Service Payments within gaming Industry. With other rivals already operating as centralized businesses, including Youtube, Amazon Prime Video, Netflix, etc., it can undoubtedly limit the expansion of AAG. AAG would itself be a block chain that focuses on smart contracts and entertainment.

It enables users to produce and distribute information and smart contracts. The ultimate goal of AAG is to establish itself as a basic-cost worldwide entertainment standard. The native token of the platform, AAG can be used to tip content producers and make service payments. The younger generation is seeking ways to reinvent how things were done in the past and utilize blockchain technology. AAG might be a valuable asset that produces gains over time.

Mission This project aims to decentralize the sharing of content on the internet, ease **Service Payments** within gaming Industry & Deliver Crypto (Digital Assets) Education through its AAG Academy.

AAG Advantages The younger generation is seeking ways to reinvent how things were done in the past and utilize blockchain technology to make lifestyle ease . Basically AAG Platform is the solution for that. It would work as blockchain as well ease the service payments within Gaming, Crypto Education, Tourism and Digital platforms and Industries.

AAG UTILIZATION & TRADE Within own developed and other exchange, Crypto ATMs, Crypto Education and Trainings, Wallets to keep & Exchange Digital assets, AAG Coin as Service Payments within all major Digital Platforms .

Vision & Mission To make the Life of Young Generation & Crypto Lovers Easy and smooth by adding **AAG Platform** as a small Contribution & Addition in Digital Assets Industry. To provide a Very Easy & Low Cost service payments system for smooth running the daily Life Globally.

AAG TOKENOMICS : AAG is available in 60 billion units overall. 9% AAG are kept for Pre-Sale as ICO and 42% AAG are to be distributed within investors in Private-Sales . 1% would be donated for **Elderly Care** to the **AAG Foundation**, 18 % are kept for the Projects Promotion & Rewards, 24% to be given to the Paul's company for Projects Completion, Execution & Service providing, 6 % is kept to be distributed within the **Core Bodies** of Six Continents @ 1% each with 6 continents to handle the Service part and Back offices **country wise**. A block shall be created by AAG Every 2 Second and the producers of Block would be paid 2 AAG for each completed block, while nodes are paid 1 AAG. That translates to an annual AAG inflation rate.
